Professional Summary

AWS Certified Developer with 5+ years of experience designing and scaling full-stack applications in cloud-native environments. Expertise in backend architecture, RESTful APIs, and microservices using Java, Node.js, and Python. Proven track record of delivering high-performance, secure systems, optimizing application scalability, and driving end-to-end feature development. Strong collaborator with experience working across cross-functional teams to solve complex business problems and improve system reliability.

Technical Skills

Languages: Java, JavaScript (ES6+), TypeScript, Python, C#

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, Spring Boot, RESTful APIs, Microservices

Databases: PostgreSQL, MongoDB, MySQL, DynamoDB, Database Design

Authentication & Security: JWT (JSON Web Token), Role-Based Access Control (RBAC), Secure API Design

Cloud & DevOps: AWS(Lambda, API Gateway, S3), Git, CI/CD, Docker

Other: System Design, AI-powered applications, LLM integration, API integrations

Experience

March, 2024 - October, 2025

Mirvish Productions, Toronto, ON - Full Stack Developer

- Designed and developed a scalable full-stack application using **React.js, Node.js, and PostgreSQL**, owning features end-to-end from architecture through deployment.
- Built and optimized **RESTful APIs**, improving average response time by **15–25%** through query optimization and efficient backend logic.
- Enhanced frontend performance by optimizing **Redux state management**, reducing unnecessary re-renders and improving page load responsiveness.
- Designed and maintained **PostgreSQL schemas, indexes, and queries**, improving data retrieval performance and supporting increasing user traffic.
- Implemented secure **authentication and authorization (JWT, RBAC)**, strengthening data protection and access control.
- Collaborated in an **Agile/Scrum environment**, contributing to sprint planning, code reviews, and **CI/CD-driven** deployments.

August, 2022 - January, 2024

Dilanko Solutions, Toronto, ON - Software Developer (Backend)

- Developed and maintained **serverless backend systems** using **AWS Lambda, API Gateway, and DynamoDB**, supporting scalable and cost-efficient application workflows.
- Designed and optimized **REST APIs**, reducing request latency by approximately **15–20%**.

- Contributed to the **migration of legacy systems to AWS**, improving system availability and reducing infrastructure overhead.
- Worked within a **microservices architecture**, enabling better service isolation and smoother feature deployment cycles.
- Collaborated closely with frontend and product teams to deliver backend solutions aligned with evolving requirements.

January, 2022 - June, 2022

Softco Vision, Toronto, ON - Full Stack Developer (Co-op)

- Developed a web application using **Angular and Node.js**, building reusable components and backend services.
- Implemented **Angular Router and component-based architecture** to create a responsive single-page application.
- Designed and integrated REST APIs using Node.js and Express to handle user data and business logic.
- Worked with **MongoDB** to design collections and implement efficient CRUD operations.
- Implemented **form validation and dynamic UI components in Angular**, improving usability and overall user experience.

September, 2018 - August, 2020

Cognizant Technology Solutions, Chennai, IN - Software Developer

- Developed enterprise-grade **backend services and REST APIs** using **Java and Spring Boot**, supporting high-volume business operations.
- Implemented **Spring Security-based authentication and authorization**, improving application security and compliance standards.
- Optimized **SQL Server queries and database design**, leading to noticeable improvements in data retrieval performance.
- Built structured **error handling and logging mechanisms**, reducing production issues and improving system stability.
- Used **Hibernate/JPA** to streamline data access and maintain clean, maintainable backend architecture.
- **Wrote unit and integration tests using JUnit and Mockito**, improving code reliability and reducing regression issues during new feature releases.

Certifications

- **AWS** Certified Developer – Associate
- **Udemy** : Learn Azure DevOps CI/CD pipelines
- **Coursera** : Getting Started with AWS Machine Learning

Education

September 2020 - May 2022

Lambton College, Sarnia - Computer Software and Database Development

August 2014 - May 2018

Kannur University, India - Bachelor's in Electronics and Communication Engineering
